

Dear FCC

RE: NAB Petition 04-160

From what I have heard about the recent petition from the NAB to limit the availability of local traffic and weather reports originating from satellite radio service providers, I can honestly say I am deeply disturbed. It is NOT NAB's responsibility to regulate a service that we as consumers pay for and subsequently have the right to decide whether or not to subscribe to. It IS the responsibility, however, for traditional radio providers to evolve their services to keep up with market demand. This is the open market. This is capitalism. This should not be decided by Congress or the FCC. Please be mindful that we, the consumers, want this service from our respective carriers. Let us VOTE, not the NAB and not the traditional radio stations.

Thank you for your understanding and consideration.

Kind Regards
